

FLIPBOARD STORYBOARD™

ABOUT

Storyboard is a content unit designed to enable brands to tell a story on a mobile device with their best assets. Elegantly stitching together a wide array of content—images, articles, social posts, animated GIFs, and of course video—brands can compose powerful and complete narratives that blend in with how we present content to our readers

RECOMMENDED LAYOUT WITH VERTICAL VIDEO

MULTIPAGE IMAGE (1/2)	MULTIPAGE IMAGE (2/2)	AUTOPLAY VERTICAL VIDEO	IMAGE COLLECTION	STORY OR PRODUCT URL	END CARD AD

FLIPBOARD STORYBOARD™

STORYBOARD PRODUCTION

Background Image

Background images should be prepared at 750x1246px, and exported as JPGs. Sensitive content should appear below the safety line—76px below the top of the image.

Overlays

Overlays are used on top of background images to ensure typography, logos, and any important content appears clearly on top of each frame.

Overlay artwork should be exported as a transparent png at the size of 686x1106px.

Gradients

Gradients are overlayed on top of the background image to allow for overlay purposes. These are visible in the template below. Please ensure any sensitive content in the background image

Template

A layered Photoshop file can be downloaded [here](#).
